Welcome to the Joint Annual Meeting 2026

Dear Members,
Dear Colleagues,

On behalf of the Scientific Committee, we are pleased to welcome you to the **Joint Annual Meeting of the Swiss Society of Neurosurgery (SSNS) and the Swiss Society of Neuroradiology (SSNR)**, along with the Association of Neurosurgical Nursing Staff Switzerland.

The **two-day meeting** takes place on **Thursday, October 29 to Friday, October 30, 2026** at the **Olma Messen St. Gallen**.

The focus of the meeting is **Tech-Powered Neuroscience: From Imaging to Intervention**, exploring how new technologies are driving real breakthroughs in neuroscience.

The program comprises **several keynote presentations, parallel sessions and satellite symposia**. In addition to engaging presentations by distinguished speakers, the keynote lectures will be complemented by 2-3 of the best abstracts.

Our **industry partners** are on site, offer opportunities to connect and to discover the latest developments and innovations. We would like to express our sincere gratitude for their support, which makes this meeting possible.

A special highlight will be the **Networking Event on Thursday evening, October 29**, at the Candela Restaurant. It provides an excellent opportunity to meet and connect with your colleagues as well as establish new professional contacts.

We are delighted to welcome you to St. Gallen and wish you an inspiring and memorable **Joint Annual Meeting 2026!**

On behalf of the Societies and the Scientific Committee

Prof. Oliver Bozinov, MD, St. Gallen
SSNS – Co-Chair 2026 – President SSNS

Prof. Karl-Olof Lövblad, MD, Geneva
SSNR – Co-Chair 2026

Prof. Isabel Wanke, MD, Zurich

P01-P86 – Moderated ePoster Flash presentations, Friday, 30.10.2026, 13:00-14:00

All authors of the ePoster will have the opportunity for a short oral presentation. Authors will present the highlights of their research work using their ePoster. The 4 sessions will take place in front of the ePoster terminals in the designated open space area in the Exhibition hall.

Presentations from the ePosters, uploaded to congress website rather than a powerpoint presentation, is required; chairpersons will moderate the sessions. (Presentation time: 3 minutes)

Terminal 1: **P01-P20:** Technology in NeuroTreatment, Spinal Fusion, LITT & HIFU

Terminal 2: **P21-P44:** Aneurysm, Vascular

Terminal 3: **P45-P65:** Others

Terminal 4: **P66-P86:** Others

Gekürzte Fachinformation Ambelvist Injektionslös. (AV) Z: 0.1 mmol/ml Gadoquatrane (= 257.9 mg) und Gadolinium (Gd) (= 62.9 mg). **Hilfsstoffe:** Calciobutrolum, Trometamol, Acidum hydrochloricum, Natrii chloridum, Aqua ad inject. **IA:** Kontrastverstärkung in der MRT bei erwachsenen und pädiatrischen Patienten ab 12 Jahren, um bekannte oder vermutete Erkrankungen im ZNS und im Körper zu erkennen und zu visualisieren. AV nur anwenden, wenn diagnostische Informationen benötigt werden, die mit einer MRT ohne Kontrastmittelverstärkung nicht erhoben werden können. **DA:** Pro MRT-Untersuchung wird die intravenöse Injektion einer 0.1 ml AV/kg KG empfohlen (= 0.01 mmol Gadoquatrane/kg KG oder 0.04 mmol Gd/kg KG). Vor der Verabreichung von AV, durch Erhebung einer Anamnese/die Durchführung von Labortests das Vorliegen einer Nierenfunktionsstörung/Bronchialasthmas/einer atopischen Dermatitis/schwerwiegender allergischer/anaphylaktoider/anaphylaktischer Reaktionen abzuklären, ist empfohlen. **KI:** Überempfindlichkeitsreaktionen gegenüber dem Wirkstoff oder einem der Hilfsstoffe. AV darf nicht subarachnoidal/epidural angewendet werden. **W/VM:** Überempfindlichkeitsreaktionen sind dosisunabhängig, können bereits nach der ersten Verabreichung des Arzneimittels auftreten und sind häufig unvorhersehbar. Bei allen Patienten die Anamnese auf eine Reaktion auf KM, Bronchialasthma und/oder allergische Erkrankungen überprüfen (erhöhtes Risiko für eine Überempfindlichkeitsreaktion auf AV). Bei Patienten mit stark beeinträchtigter Nierenfunktion/Patienten in der perioperativen Phase einer Lebertransplantation der Nutzen gegenüber den Risiken überwiegen (Möglichkeit für das Auftreten von NSF). Bei Patienten mit erniedrigter Krampfschwelle Vorsicht geboten. Bei Patienten mit schweren kardiovaskulären Erkrankungen AV nur nach sorgfältiger Nutzen-Risiko-Abwägung anwenden. AV darf nicht intrathekal angewendet werden. **SSJS:** In der Schwangerschaft nicht anwenden. Das Stillen sollte für 24 St. nach Verabreichung unterbrochen und Muttermilch verworfen werden. **UW:** häufig: Reaktionen an der Injektionsstelle, Kopfschmerzen, Schwindelgefühl, Überempfindlichkeit. Gelegentliche UW siehe Fl. Liste B.
